PROFILE

As a passionate and experienced full-stack developer, I specialize in building dynamic, high-performance web applications. With 5 years of experience, my technical expertise spans across Laravel, Node js, JavaScript, and Angular enabling me to craft seamless and efficient solutions from front-end interfaces to back-end functionalities.

With a strong foundation in software development, I excel in developing robust and scalable applications that meet and exceed client expectations. My ability to integrate various technologies and frameworks ensures the delivery of user-centric and innovative web solutions.

WORK EXPERIENCE

- Dyn Edge SDN BHD (philippines)** *JUN 2023 TO PRESENT*
Senior Software Developer
 - I worked as a full-stack developer, where I developed and maintained a variety of web applications. These projects included hospital management systems and e-commerce applications, utilizing Angular and React JS for the front end and Laravel for creating robust REST APIs.
- SAIntellect Solutions** *Jul 2020 to May 2023*
Software Developer
 - At Saintellect Solutions, I further honed my skills by working with Laravel and Angular for web applications and Ionic and React Native for creating mobile applications, showcasing my versatility and ability to adapt to different development environments.
- Efreedomtech Solutions** *May 2019 to Jun 2020*
Software Developer
 - My career began at eFreedomTech Solutions, where I worked as a junior developer. During this time, I started learning to create web applications using PHP and Laravel, as well as mobile applications using Ionic.

PROJECT DETAILS

Emmatshopping

- Developed a full-stack e-commerce website with a Laravel-based RESTful API and Angular for the frontend. Implemented user authentication functionalities, including login, registration, and password recovery, for the admin panel. Designed and developed modules for category and subcategory management, product management, and attributes management. Integrated SEO management tools to enhance search engine visibility. Built a dynamic shopping cart system, comprehensive order management, and delivery tracking functionalities to streamline user experience. Ensured seamless operations and scalability through robust API endpoints and responsive front-end components.
- Real-time chat system using Laravel and Pusher, enabling seamless interaction between users and administrators. Implemented features for viewing users' last seen status, sending and receiving images and documents, and deleting chat messages. Ensured efficient communication with real-time updates and a user-friendly interface, enhancing user engagement and support capabilities.

Senguptasresearchacademy

- Developed a comprehensive e-learning platform using Laravel and Angular allowing users to purchase courses and access study materials, including videos and PDFs
- Multiauthenticated Guard used for both the user and Admin authentication
- Integrated features for user engagement, such as commenting on courses and accessing free lectures.
- Designed and implemented a quiz management system to enhance the learning experience.
- Enabled administrators to create and manage blogs related to courses. Incorporated Razorpay for secure payment processing, ensuring seamless transactions and a user-friendly interface.

Insightaviationservices

- Developed a robust Learning Management System with an Angular-based frontend and Laravel-powered backend API.
- Implemented user authentication features, including registration, login, and password reset for individual users and corporate accounts.
- Designed a dedicated instructor portal for creating quizzes and exams with multiple-choice and long-answer questions.

- Managed key administrative functionalities such as certificate issuance, license management, course organization, logbook tracking, material distribution, and quiz management. Delivered a scalable and efficient platform tailored to streamline learning and administrative processes.

Palayn E-system (Malaysian Hospital Management system)

- I implemented Laravel's Authentication, Middleware, Events, and Broadcasting Messages using Pusher. The project includes various modules such as Business Permit, Fire Protections, Planning and Development, Health and Safety, Engineering, and Traffic Management.
- I also created the front end using Angular, incorporating SocialAuthService, GoogleLoginProvider, FacebookLoginProvider, FormBuilder, Angular Validators, and RXJS operators. Additionally, I integrated the EGHM payment method for managing customer payments.

ECorsakur (Railway Sports Management)

- Developed a comprehensive Railway Sports Management System featuring modules for blogs, news updates, courses, and trainers.
- Integrated a sports category system allowing users to explore and register for various sports.
- Enabled users to receive real-time updates on training schedules and join sports teams.
- Designed a user-friendly interface to facilitate seamless interaction between users and the management team, enhancing engagement and participation in sports activities.

SWICN (Product management system)

SOULACA (Product management system)

HRMS (HR Management system)

CONDOAPP (Malaysia based finance management system)

Kroma (Malaysia based finance management system)

Palayan (Malaysia based Hospital management system)

ZandoFi (An Ecommerce management system)

Growtop (Garage Management System)
